

## EAT. SWALLOW. LIVE. – Advancing Dysphagia Care in Head & Neck Cancer

HNCII in collaboration with IAPEN India, conducted a One Day Dysphagia Workshop titled “EAT, SWALLOW, LIVE – A Multidisciplinary Approach to Dysphagia in Head and Neck Cancers” on 31st January 2026 at HNCII.

The workshop emphasized a comprehensive multidisciplinary approach to dysphagia management in head & neck cancer patients. Experts from surgical oncology, radiation oncology, plastic surgery, speech-language pathology, and dietetics shared evidence-based insights on improving swallowing outcomes and nutritional care post head and neck cancer surgery.

The program included faculty lectures, a multidisciplinary panel discussion, practical IDDSI consistency demonstrations for dietitians, and hands-on FEES session for SLPs, providing valuable experiential learning for all delegates.
